

26–29 July 2021, Online

International Solar Fuels Conference 2021

Since 2015, the ISF conference series has been a highlight for the global solar fuels community. In 2021, the online conference will continue to offer an exciting and inclusive programme, with the main conference (28–29 July) preceded by the Young conference (26–27 July).

Themes

Multi-electron/multi-proton catalysis (homogeneous, heterogeneous, enzymatic and bioinspired processes)

Light-harvesting and light-driven processes

Photoelectrochemistry

Photobiological approaches

Metabolic engineering

Devices and demonstration: robustness, sustainability and upscale

Speakers include

Harry Gray
Caltech, USA

Pia Lindberg
Uppsala Universitet,
Sweden

Li-Zhu Wu
Chinese Academy
of Sciences, China

Ted Sargent
University of Toronto,
Canada

Kevin Sivula
EPFL, Switzerland

Chairpersons

Vincent Artero
CEA, France

Leif Hammarström
Uppsala Universitet,
Sweden

Ann Magnuson
Uppsala Universitet,
Sweden

Eric Maréchal
CNRS, Grenoble
France
